# ABOUT US

Hi-Cube Global Oil and Gas Limited is an indigenous petroleum services company marking a landmark for excellence in the oil and gas industry with the knowledge and experience of modern global standards. We are a service provider contributing toward the growth and international standing of the Nigerian Oil and Gas industry. Located in the capital city of Abuja, we deliver exquisite exploration and production, refinery acquisition and operation, oil vessel leasing, marketing and sales of petroleum products, and production tools supply and installation services nationwide. With our prime location, we are capable of accessing premium economic hubs in the country and we facilitate the extension of supply chains across both urban and remote rural areas.

Our team at Hi-Cube Global Oil and Gas Limited consists of highly-qualified, field-trained, and industry expert professionals who have combined decades of experience in the oil and gas industry both in Nigeria and on the international market. We deliver expert services that are tailored to meet our clients' needs uniquely while maintaining international standards for quality and excellence. Amplifying our capacity as professionals from all sectors, including our specialized management team, we encourage inter-team collaborations by pulling our resources and knowledge bank into the consistent delivery of our mission statement.

Empowered by our unique methods of operations and service structures, we ensure that every project and requirement is carried out to the best possible standard of efficiency and quality. Our method of operations and service delivery is structured to ensure that every project is carried out with uniquely designed solutions for the best standards in efficiency and quality. We emphasize professionalism at all phases of our supply network and ensure that our field-based projects are executed perfectly. Every professional representing an aspect of our service strategy is a reflection of the integrated consultation, implementation, and management collaborations we imbibe to ensure the sustainability of projects on all scales.

# CORPORATE STATEMENTS

## Vision Statement

Our vision is to be a leading trusted partner in the global oil and gas industry by improving our supply chain management solutions, fostering international collaborations, and providing significant value.

## Mission Statement

Our mission is to produce and market exquisite quality petroleum products and maintain a global standard of excellence and satisfaction for our clients through compelling service delivery.

## Core Values

### Professionalism

Hi-Cube Global Oil and Gas Limited offers services catered to by professionals who are highly qualified and trained with exceptional field experience.

### Integrity

We place great value on honesty at Hi-Cube Global and we ensure that our services meet up with clients' requirements and exceed their expectations.

### Reliability

As a team of professionals, we spotlight specificity and standards in all our services, ensuring that we deliver perfection and match up to our client's expectations.

### Teamwork

Our team is at the heart of our services and we put great effort into facilitating cohesive operations across all professionals.

### Ethics and Safety

We maintain the highest ethical standards for all our services at Hi-Cube Global. Safety is our watchword.

# OUR SERVICES

## Oil And Gas Exploration and Production

Our team of engineers and field operators optimizes the production of wells, facilities, and reservoirs to help you maximize the value of your field asset in the oil and gas sector. We use our unique knowledge bank and resource capacity to help you find solutions to your oil and gas exploration and production challenges. Our innovative solutions are focused on maximizing the value of your assets by conducting well performance optimization, resolving flow assurance problems, facility debottlenecking, gas lift, production system, and reservoir optimization. Our services include comprehensive drilling, engineering, and production technology to meet your capacity needs and resolve constraints. Our experts have a broad range of experience in the drilling and completion engineering design for wells across different geographical locations with a range of complexity. We assist you with casing design, cement design, drilling and completion fluid design, OCTG metallurgy, hydraulic fracturing operations, and advanced geo-mechanics. We conduct the initial exploration services of testing, inspection, measurement, and other services for the downstream oil and gas industry and we also support customers' needs as it pertains to accessing refineries, terminals, ships, barges, pipelines, and gas processing plants. We help you manage the process from design to production seamlessly.

## Refinery Acquisition and Operations

Our service delivery in the refinery acquisition and operations sector focuses on the design, construction, and maintenance of industrial plants for petroleum refining and production. We develop unique structures for the production of gasoline, diesel fuel, asphalt base, fuel oils, heating oil, kerosene, and liquefied petroleum gas. Our processes in this sector begin with assessment, functional test, maintenance assessment, development screening, technical cost assessment, economic analysis, and risks/opportunities analysis to maximize the chance of success for all our clients' ventures. Our team is experienced with varying concepts and project complexities, and they can ensure that the refinery acquisition and operations are carried out according to requirements and global standards. Our experts at Hi-Cube Global Oil and Gas Limited also oversee field development and pipeline construction with a focus on high-quality products for upstream, midstream, petrochemical, and refining markets. We ensure that our clients' projects and processes are in line with compliance policies by conducting Environmental Impact Assessment (EIA), HSE policy reviews, and general maintenance. We provide Operations Support, Facility Production Optimization services, and Asset Integrity Management. Our engineering and design services for this sector include steel frame design, concrete frame design, bridges and tunnels design, processing control design, system design and installation, electrical power, systems analysis, testing and commissioning, and electrical safety. Our technical team is qualified to operate industrial machines and equipment for refining and we ensure that all operations adhere to the goals of sustainability and excellence.

## Oil Vessel Acquisition and Leasing

In addition to our refinery acquisition services, we procure oil vessels that meet a specific standard. We enlist the expertise of our on-field experts to assess potential acquisitions and conduct comprehensive tests and assessments before determining the decision to acquire or pass on a vessel. We refine, maintain, and rebrand acquired oil vessels and bring them up to our standards following international metrics for quality and excellence. This makes our oil vessels the best quality for leasing by private, corporate, and industrial clients. Our professionals cover all aspects of oil vessel leasing and logistics. Our services in this sector are supported by experienced skilled personnel with backgrounds in the offshore marine sector and trained to handle varying scales of oil vessel transportation and maintenance. We offer an unparalleled level of technical expertise to support your oil vessel leasing and related operations. We are wholly committed to customer satisfaction and we ensure the health and safety of clients, contractors, communities, and the environment, through all our processes for unique service delivery in this sector of our expertise.

## Marketing and Sales of Petroleum Products

We are professional suppliers and marketers of petroleum, oil and gas, petrochemical, natural gas, and other petroleum derivatives. We can establish and operate petrol filling stations and erect all necessary structures, independent marketers, and major distributor channels to serve as an agent of the Nigerian National Petroleum Corporation (NNPC) for the nationwide distribution of fuel, kerosene, and gas, cooking gas, petrochemicals, and allied products.

Furthering our holistic service delivery strategy for petroleum products, Hi-Cube Global Oil and Gas Limited offers a broad range of marketing, haulage, and logistics services, alongside the sale of petroleum products. This sector of our services is responsible for the supply of petroleum products according to the guidelines of the Nigerian National Petroleum Corporation (NNPC), providing informative and promotional content about our products, and facilitating sustainable retail and bulk services with warehousing options for all our clients. We carry out marketing, supply, and sale of jet fuel, kerosene, cooking gas, Automotive Gas oil (AGO), which is more commonly known as diesel, and Low Pour Fuel (LPFO) to private, commercial, and industrial clients nationwide. Emphasizing our integrity as a member of the Oil and Gas sector in Nigeria, Hi-Cube Global Oil and Gas Limited adopts world-class technology for warehousing and inventory. We ensure to fulfil our clients' requirements with excellence in exceptional standards. We offer our retail distribution network to ease the transportation, marketing, and sales of petroleum products for our clients nationwide.

## Supply and Installation of Production Tools

At the core of all services in the Oil and Gas sector is the availability of the best quality materials and tools. Our services at Hi-Cube Global Oil and Gas Limited include the procurement, supply, and installation of production tools for all phases of petroleum production.

We offer our clients the quality assurance of a supply chain that is backed by a reputable partnership with local vendors and global manufacturers. Our supply chain solutions source hard-to-find parts and spares through the procurement of equipment, valves and fittings, line pipes and heavy equipment, rotating equipment, cryogenic valves, and structural steel. We oversee the procurement and importation of materials, as well as storage to support onshore/offshore developments and expert installation of these production tools. Our procurement team is well-versed in budget optimization, feasibility assessment, regulatory and compliance planning, assessment and management, and expert procurement procedures. We strive to meet the international standard for quality in all production tools supplied and installed by Hi-Cube Global. We provide innovative solutions through the expertise of our team and efficient procurement. Our team in the procurement sector of our services collaborates with the exploration and production teams to source, purchase, and deliver equipment required for quality-assured project completion per client specifications to guarantee customer satisfaction.

# Environmental Consultancy Services

Organizations in all business sectors are currently faced with challenges such as determining the environmental impact of their operations, comprehending and adhering to regional standards and best practices, putting environmental solutions into practice within set deadlines, and filling key positions for environmental projects. In order to reduce the environmental impact of their operations and services, businesses are increasingly turning to outside experts for advice on how to implement sustainable strategies and production methods.

Environmental consulting services are offered by Hi-Cube Oil & Gas Limited across a wide range of specialties. We use our in-depth knowledge and expertise and share best practices with a view to delivering value to our client organizations and lowering their risks, ranging from landmark environmental, social, and health impact assessments (ESHIA) to local, one-off environmental management solutions. Any environmental concerns a client might have can be addressed by our technical expertise.

Clients who choose Hi-Cube environmental consulting services have access to a multidisciplinary team of experts with experience in a variety of fields who can provide support at all operational levels. Our professionals are in a good position to use our company's vast international resources to meet local needs.

In addition to the above offerings, our area of expertise also covers:

- EIA
- Baseline/Post Impact Studies
- Compliance Monitoring/Audit
- Environmental Accounting/Environmental Economics
- Environmental Management System
- Strategic Environment Risk Management

## Environmental Management Services

According to the conditions and guidelines included in permits, the majority of industrial businesses are obligated to monitor the environmental effect of their activities and come up with ways to reduce pollution. For big industrial enterprises in Nigeria, such as those in the engineering industry, waste management industry, and other industry sectors, Hi-Cube provides services in the application of different types of permits, environmental management, production of licenses, and monitoring programs. We also provide paperwork and environmental reporting services to Nigerian authorities, including carbon accounting and green accounting, for businesses and organizations.

The integration of environmental management into organizations' quality management systems is growing. Hi-Cube has aided various businesses with the creation of an environmental policy, the design of the system, and its implementation as part of this expanding trend. Conducting an environmental assessment of the business, its operations, and related environmental factors before operations begin as well as measuring and tracking environmental performance while operations are underway are crucial components of environmental management. Environmental factors are defined as having a substantial environmental effect and may be assessed to monitor performance depending on the nature and magnitude of the project.

Our services in Environment management services include:

- Waste Management Technology
- Engineering Oil & gas
- Pollution Control
- Remediation
- Marine Pollution Management
- Oil Spill Clean Up
- E-Waste Management
- Effluent Treatment
- Sewage/Sludge Evacuation
- Tank Cleaning

## Environmental Equipment Supply

Hi-Cube offers Environmental Equipment Supply services. We act as your one-stop shop for sales, rentals, and supplies of environmental equipment. Some of our range of product supplies include the following; Grundfos Environmental Duty Pumps, RAE Systems Instruments, RKI Instruments, Solinst Groundwater Monitoring Products, Horiba Water Quality Instruments, ProActive 12 Volt Pumps, In-Situ Data Loggers, Hanna Instruments, Heron Instruments, Masterflex Peristaltic Pumps, Tam Inflatable Packers, Ammex Gloves and more. We also specialize in the following services: Geoprobe and Geophysics rentals and services, environmental field supplies, a complete line of locators, product sales for water and monitoring well pumps including products from Campbell Manufacturing, environmental pumps including Tefzel motor leads, custom environmental retro-fitting of pumps, motors and a full line of products for submersible pump installation and so much more.

## HSE Training Services

At Hi-Cube, we recognize the need for effective training to enhance efficiency, so we provide the best calibre of professional training to advance the abilities of your workforce.

You cannot undervalue the advantages of training your team. In addition to enhancing operations, the provision of skills and knowledge improves organizational agility, lowers labour costs, and fosters company development and cultural growth. This gives you a competitive advantage on a strategic level.

Our training courses encompass a wide range of subjects relevant to quality, performance, health, and safety, as well as IRCA-accredited training for the development of auditors. We provide customized training from subject-matter experts, and our programs are created for students with varying levels of skill to meet the demands of any sector.

Our teachers are a team of experts in safety and hazardous materials who provide "hands-on" instruction in hazardous waste, emergency response, confined space entry, technical rescue, and other necessary training in a realistic setting as an effective substitute for "conventional" lectures. We provide training courses that adhere to international certification standards.

# HSE POLICY

Hi-Cube Global Oil and Gas Limited is an integrated petroleum production and distribution company with a consciousness of the implications of our services for the health and safety of our staff, clients, members of the community, and environmental preservation. Therefore, we have developed this Health, Safety & Environment (HSE) policy to guide our processes on the acknowledgment that;

- We adhere strictly to the standards required by all relevant legislation and regulations.
- We place immense value on the health and safety of our workforce.
- We conduct activities while ensuring that there are no adverse effects on any persons.
- We take practical measures to prevent and eliminate risks of injuries and disabilities.
- We put in considerable effort to address ill health, occupational diseases, and damages.
- We ensure the security of all stakeholders as it pertains to our services and processes.
- We minimize the impact of our industrial and refining activities on the environment.
- We comply with all statutory requirements and industry standards.
- We ensure that stakeholders understand their obligations concerning health and safety.
- We engage, consult, and communicate a shared commitment to health and safety.
- We encourage process-based and risk-based thinking in situations of health and safety.
- We provide the required resources, facilities, plants, tools, equipment, and maintenance.
- We encourage proactive behaviour in identifying and reviewing workplace hazards.
- We provide sufficient resources and training to ensure adherence to the HSE policy.
- We mandate that our teams follow the best practices for HSE compliance.
